Ultrasonic Compact Cleaners

Innovative Cleaning Solution POWERHOUSE OF ULTRASONIC TECHNOLOGY®

Microprocessor based Ultrasonic Cleaners

Ultrasonics, i.e. high frequency vibra ons, generate agita on in liquid resul ng into 'Cavita on', which is rapid forma on and collapse of minute bubbles in liquid. Implosion of bubbles with high pressure on exposed surface of component dislodges and removes contamina on like dirt, dust, oil, grease, chips, wax, lapping paste, carbon etc.

Very high degree of cleaning can be achieved in mul -chamber/mul -opera on cleaning system with proper orienta on of components, filtra on of cleaning liquid, rinsing of components and drying with air and/or vacuum.

Advanced Features

- ÿ Digital Control of me and temperature.
- Ÿ SS tank with complete SS body. Simple opera on.
- Ÿ Longer tank life.
- Ÿ Low noise level.
- Ÿ Suitable for con nuous opera on.

- Rugged and easy to clean stainless steel housing.
- Y Automa c frequency tuning for maximum output.
- Ÿ Latest technology with fully transistorized generator.
- γ Universal applica on.
